Professional Summary

Results-driven Software Test Engineer with 4.8 years of experience in Manual Testing, Automation (Selenium, WebDriverIO), and API Testing (Postman, REST Assured) in Agile banking projects. Adept at writing test cases, debugging automation scripts, and validating backend data using SQL. Proficient in Java, TestNG, Maven, JIRA, and CI/CD pipelines. Demonstrated success in delivering high-quality software by collaborating with cross-functional teams and ensuring test coverage across SDLC.

Core Competencies

- Automation Testing: Selenium WebDriver, WebDriverIO, TestNG, Cucumber BDD
- API Testing: REST Assured, Postman
- Programming Languages: Java (Primary), Python (Basic)
- Build & CI/CD: Maven, Jenkins, GitHub Actions, GitLab
- Databases: MySQL, SQL
- Agile Tools: JIRA, Bamboo
- Reporting: Allure Reports, Extent Reports

Work Experience

Wipro Technologies Ltd, Pune — Software Test Engineer (Feb 2022 – April 2025)

Project: Standard Bank of South Africa

- Automated large-scale regression suites for retail banking modules using Selenium WebDriver, Java, and TestNG, reducing manual testing by 40%.
- Performed API testing with REST Assured for account creation, payment processing, and loan disbursement.
- Executed SQL queries to validate backend data across multiple environments (UAT, SIT, Production).
- Developed reusable components in POM-based automation framework and integrated with Jenkins CI/CD pipelines.
- Generated Allure and Extent HTML reports for release readiness, improving visibility of test results.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.

PhoenixZone Technologies Pvt. Ltd, Pune — Software Test Engineer (Aug 2020 – Feb 2022)

Project: ANZ Bank – Internet Banking Automation (Fund Transfer & Bill Payments)

- Designed and implemented a Cucumber BDD automation framework with POM using Selenium WebDriver and Java.
- Performed functional and regression testing for Internet Banking modules including fund transfers, bill payments, and transaction history.
- Conducted API testing using REST Assured and validated backend with SQL queries.
- Configured Jenkins pipelines for scheduled automation runs, enabling CI/CD integration.
- Generated Allure and Extent reports for automation results and shared with stakeholders.

Projects

BankPro Automation Framework

Technologies: Java, Selenium, TestNG, Maven, REST Assured, GitHub Actions, Allure reports.

- Built an end-to-end test automation framework for ParaBank (an online banking demo site).
- Automated core flows: Login, Open Account, Transfer Funds, Account Overview, Logout.
- Designed scalable Page Object Model with reusability and central config management.
- Integrated API test layer using REST Assured for backend validation.
- Set up Allure & Extent Reports for detailed test visualization with screenshot support.
- Integrated GitHub Actions for CI: Automated test runs on every push with report artifacts.

Sauce E-Commerce Order Management

- Built a Cucumber BDD + Selenium WebDriver (Java, POM) framework from scratch.
- Automated core workflows: login, add-to-cart, checkout, and order confirmation.
- Applied data-driven testing for multiple products and scenarios.
- Configured Maven & JUnit for build and execution.
- Integrated with Jenkins for CI/CD and GitHub for version control.

Education

MBA – Information Technology, BAMU, Aurangabad
Bachelor of Agriculture Science

Certifications

- ISTQB Certified Tester Foundation Level v4.0
- SDET Certification and Selenium Level 1 & 2 – Udemy
- Docker Foundations Professional Certificate – LinkedIn Learning
