Ajinkya Vitthal Ghodke

Software Test Engineer | Automation & API Testing Specialist

Pune | 9359850752 | ajinkyaghodke04@gmail.com | LinkedIn: www.linkedin.com/in/ajinkya-ghodke-17aa3b246

Professional Summary

Results-driven Software Test Engineer with 4.8 years of experience in Manual Testing, Automation (Selenium, WebDriverIO), and API Testing (Postman, REST Assured) in Agile banking projects. Adept at writing test cases, debugging automation scripts, and validating backend data using SQL. Proficient in Java, TestNG, Maven, JIRA, and CI/CD pipelines. Demonstrated success in delivering high-quality software by collaborating with cross-functional teams and ensuring test coverage across SDLC.

Core Competencies

- Manual Testing | Automation Testing | Regression Testing | Functional Testing

- Selenium WebDriver | WebDriverIO | TestNG | REST Assured | Postman

- Core Java | SQL | Python | SAP CML | MySQL

- API Testing | Smoke Testing | JIRA | Bamboo | Agile & Scrum

- CI/CD | GitLab | Maven | Defect Tracking | Web Accessibility Testing

Work Experience

Wipro Technologies Ltd, Pune — Software Test Engineer

Feb 2022 – April 2025

Project: Standard Bank of South Africa

- Automated large-scale regression suites for retail banking modules using Selenium WebDriver, Java, and TestNG, reducing manual testing by 40%.

- Performed manual testing for loan origination, fund transfers, onboarding, and transaction workflows.

- Conducted API testing with REST Assured for account creation, payment processing, and loan disbursement.

- Executed SQL queries to validate backend data across UAT, SIT, and Production environments.

- Developed reusable components in POM-based automation framework.

- Managed automation execution through Jenkins CI/CD pipelines.

- Generated Allure and Extent HTML reports for release readiness.

- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.

PhoenixZone Technologies Pvt. Ltd, Pune — Software Test Engineer

Aug 2020 – Feb 2022

Project: ANZ Bank – Internet Banking Automation (Fund Transfer & Bill Payments)

-Performed functional and regression testing for Internet Banking modules including fund transfers, bill payments, and transaction history.

-Designed and implemented a Cucumber BDD automation framework with POM using Selenium WebDriver and Java.

-Automated UI workflows for beneficiary management, fund transfers, and bill payments.

-Conducted API testing with REST Assured to validate payment status, transaction confirmation, and account balance retrieval.

-Used SQL queries to validate backend transaction entries and account balances.

-Configured Jenkins pipelines for scheduled automation runs, enabling CI/CD integration.

Generated detailed Allure and Extent Reports for automation results and shared with stakeholders.

Project: BankPro Automation Framework

Technologies: Java, Selenium, TestNG, Maven, REST Assured, GitHub Actions, Allure reports.
GitHub: https://github.com/ajinkyaghodke123/BankPro-Automation-Suite

-Built an end-to-end test automation framework for ParaBank (an online banking demo site)
-Automated core flows: Login, Open Account, Transfer Funds, Account Overview, Logout.
-Designed scalable Page Object Model with reusability and central config management

-Integrated API test layer using REST Assured for backend validation. Set up Allure & Extent -Reports for detailed test visualization with screenshot support. Integrated GitHub Actions for CI: Automated test runs on every push with report artifacts.

Education

MBA – Information Technology, BAMU, Aurangabad |

Certifications

- ISTQB Certified Tester Foundation Level v4.0 (ID: 25-120445)

- SDET Certification – Udemy

- Selenium L1 & L2 Certifications – Udemy

Professional Strengths

- Strong Analytical & Problem-Solving Skills

- Proficient in Automation & API Testing

- Effective Communication & Collaboration Skills
